

## Manufacturing & Engineering Virtual Career EXPO 2020

The goal behind this game is to learn about four companies currently operating from and employing people in North County San Diego: What those companies do, what working at them is like, what kind of education could prepare you for a job there and what sort of problems their team members solve.

The Game Chart provides a space for taking notes about the companies.

Play the Game:

Roll the die (click on the hand) and move your color token to the left (starting from #1) the number of spaces indicated by the die. Click on the **i** for instructions to complete that move.

Each landing space will have an **i**. Follow the instructions. Some will be a card selection others will be video presentations.

Use the Game Chart to keep track of information provided as you move around the board.
