

NORTH COUNTY

JOB POSTING REPORT

SCIENCE. TECHNOLOGY. ENGINEERING. MATHEMATICS

QUARTER 3 2024

The Third Quarter 2024 North County STEM Job Postings Report measures demand for workers in STEM occupations by looking at unique job postings. This report examines who is hiring, the relative intensity of these efforts, and the key skills employers seek in Oceanside, San Marcos, Vista, Carlsbad, Escondido, Encinitas, and Poway.

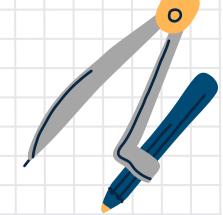

The job market in North County seems to be improving. In 2023, hiring activity experienced declines. However, since the beginning of 2024, recruiting activity has increased in all three core areas of North County's tech economy: Life Sciences, Defense, and Software/Communications. Though flat between Q2 and Q3, Year-over-year North County saw a 26% increase in the number of unique STEM job postings. This leading indicator suggests that the remainder of 2024 and 2025 will be positive for North County's economy.

Key Findings:

- **Hiring Activity Decrease:** Q3 saw a less than 1% rise in job postings and a 5% decrease in employers competing for STEM talent compared to Q2.
- Increased Job Posting Duration: The average median duration of job postings increased significantly from 19 days to 26 days, signaling a more challenging time for companies to fill positions.
- Active Recruiters: General Atomics Aeronautics in Poway, Thermo Fisher, and Viasat in Carlsbad remain the most active in recruiting.
- **Skill Mismatches:** The report highlights mismatches between the skills companies are seeking and those listed in the LinkedIn profiles of North County residents.

Job Posting Analytics Q3 (July-September 2024)

Unique Postings

2,164 (2,143 in Q2)

Employer Competition

674 employers recruiting (626 in Q2)

Average Job Post Duration

26 days median post duration on job boards (Q2 – 19 days duration)

The increase in the length of time from when a job positing appears to when it is taken down is an indicator that North County companies are having a harder time filling STEM related positions.

Average Job Posting Intensity

Posting intensity is the ratio between the number of job boards on which each unique posting is advertised and assumes that employers use more boards when struggling to attract qualified candidates 3:1 (4:1 in Q2)

Job posting intensity has become less intense since last quarter

Please note: Readers should be cautious in comparing prior reports to this new definition of STEM occupations, for this report includes computer science and software engineering jobs within the number of occupations examined.

Top 10 North County Companies Recruiting for STEM Occupations

| Company | Unique Postings | Posting Intensity | Median Posting Duration |
|---|--------------------|----------------------|----------------------------|
| <u>General Atomics</u> (Poway) | 253 | 4:1 | 34 days |
| <u>Thermo Fisher Scientific</u> (Carlsbad) | 115 | 5:1 | 34 days |
| <u>Viasat</u> (Carlsbad) | 63 | 3:1 | 31 days |
| <u>L3Harris Technologies</u> (Carlsbad) | 45 | 3:1 | 27 days |
| <u>Leidos</u> (Vista) | 36 | 6:1 | 17 days |
| <u>Apple</u> (Escondido) | 26 | 5:1 | 48 days |
| <u>Pratt & Whitney</u> (Carlsbad) | 25 | 6:1 | 26 days |
| Frontgrade Technologies (Carlsbad) | 25 | 1:1 | 26 days |

General Atomics and Thermo Fisher Scientific have the highest job intensity on this list. Competition to apply for companies such as Leidos is lower than in Q2 as evidenced by their job postings lasting an average of 17 days or more on job sites.

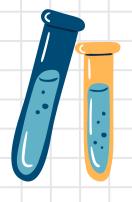

Top Occupations Posted

Please note: Unique postings in comparison to total postings suggest that these are specialized and competitive professions.

| Occupation | Unique Postings | Posting Intensity | Median Posting Duration |
|--|--------------------|----------------------|----------------------------|
| Sales Representative | 184 | 4:1 | 23 days |
| Software Developer / Engineer | 150 | 3:1 | 25 days |
| Computer Support Specialist | 130 | 4:1 | 29 days |
| Computer Systems Engineer / Architect | 108 | 3:1 | 18 days |
| Mechanical Engineer | 89 | 3:1 | 18 days |
| Electrical Engineers | 77 | 3:1 | 32 days |
| Industrial Engineers | 72 | 3:1 | 24 days |
| Engineering Manager | 64 | 3:1 | 31 days |
| IT Manager / Director | 52 | 3:1 | 27 days |
| Manufacturing / Production Technician | 50 | 3:1 | 36 days |

This quarter's professions have a relatively low job posting intensity as well as a less competitive posting duration than in Q2, with the most competitive being 18 days.

Top Industry Postings in North County

| Industry | Unique Postings | Posting Intensity | Median Posting Duration |
|---|--------------------|----------------------|----------------------------|
| Research and Development in the Physical, Engineering, and Life Sciences (except Nanotechnology and Biotechnology) | 275 | 4:1 | 34 days |
| Analytical Laboratory Instrument Manufacturing | 126 | 5:1 | 32 days |
| Engineering Services | 96 | 4:1 | 25 days |
| Radio and Television Broadcasting and Wireless Communications Equipment Manufacturing | 63 | 3:1 | 31 days |
| Other Communications Equipment Manufacturing | 46 | 3:1 | 27 days |
| Pharmaceutical Preparation Manufacturing | 42 | 3:1 | 27 days |
| Wholesale Trade Agents and Brokers | 33 | 2:1 | 15 days |
| Electronic Computer Manufacturing | 31 | 5:1 | 48 days |
| Custom Computer Programming Services | 27 | 3:1 | 30 days |
